Site History: These 2 parcels are located on the west-side of the SJ International Airport. The site is also known by the Airport address of 1701 Airport Blvd.. The current use is parking lot and staging area for construction materials for the airport; and historically this area was agricultural farmland. There are plans to put in multiple hangars, parking lots and runway access taxiways.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 35010
Site Name: H & M PRECISION MACHINING
Violation Date: 08-24-2021
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 09/01/2021. Transfer drum had waste oil in an a open container, no cover was present. Discussed transferring the waste oil into the hazardous waste drums by end of business day, otherwise all hazardous waste containers must be closed unless transferring material into or out of the containers.

Violation Description: Section(s) 25508.2
Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 08/24/2021. The entire HMBP was last reviewed and submitted on CERS on 8/7/2017 and updated on 2/8/2018. The HMBP was updated and submitted on CERS at time of inspection.

Violation Division: Santa Clara City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 35010
Site Name: H & M PRECISION MACHINING
Violation Date: 08-24-2021
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 08/24/2021. 4 hazardous waste oil drums stored outside were not properly labeled with the required elements- One label was faded. Ensure that when material is added, the container is labeled with the words Hazardous Waste, composition- oily water, hazard, physical state, and accumulation start date. A label was properly affixed to the waste oil drums at time of inspection

Violation Division: Santa Clara City Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 35010
Site Name: H & M PRECISION MACHINING
Violation Date: 08-24-2021
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 09/01/2021. Hazardous waste oil drums were last picked up 10/31/ 2017. The shop was closed for 5 months in 2020 due to COVID 19 protocols. Hazardous waste must be picked up every 6 months. Facility owner discussed calling vendor to pick up waste oil.

Violation Notes: disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days. Returned to compliance on 09/06/2023. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

HSC 6.5 25160(b)(3) - California Health and Safety Code, Chapter 6.5, Section(s) 25160(b)(3)

Violation Description:

Failure to determine the status of any hazardous waste if a signed copy of the manifest isn t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isn t received within 45 days of the date the waste was accepted by the initial transporter.

Violation Notes:

Observation: The generator failed to determine the status of a uniform hazardous waste manifested shipment within 35 days from the date the waste was shipped, and/or to submit an exception report to DTSC if a signed copy of the manifest isn't received within 45 days of the date the waste was accepted by the initial transporter. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the generator has determined the status of the hazardous waste manifest shipment for 008586348SKS, 008520808SKS, 008728779SKS, 008752923SKS and 008639905SKS or a copy of the exception report submitted to DTSC, if applicable.

CERS:

Name: BERTOLIN ENGINEERING
Address: 485 ROBERT AVENUE
City,State,Zip: SANTA CLARA, CA 95050
Site ID: 11908
CERS ID: 10086217
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 11908
Site Name: BERTOLIN ENGINEERING
Violation Date: 08-24-2021
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: The owner/operator explained that the three hazardous waste oily drums have not been picked up by Safety Kleen in approximately 7months. Labels were not affixed to the outside of the container, therefore could not be verified. Receipts for pick up are not maintained on site. Properly dispose of the hazardous waste oily water and send a copy of the receipt/ manifest to the requesting inspector upon

Violation Source:	HW
	CERS,
Site ID:	11908
Site Name:	BERTOLIN ENGINEERING
Violation Date:	08-24-2021
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Receipts for oily water were not maintained on site and therefore not readily available for review. Discussed sending copies of the last 3 years of receipts and the most recent pick up. Receipts and/or manifests for hazardous waste must be maintained on site for the last 3 years.

Site ID: 11908
Site Name: BERTOLIN ENGINEERING
Violation Date: 08-24-2021
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Three drums of hazardous waste oily water throughout the shop did not have a hazardous waste label properly affixed to the outside of the containers. Safety Kleen picks up drums and a label may be affixed to the drum inside the secondary containment overpack container, but could not be verified. Label the outside of the drum containers with the required elements and satellite accumulation date.

Violations:

Site ID: 628425
Site Name: VARGAS GARDENING
Violation Date: 06-01-2018
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).
Violation Notes: Returned to compliance on 06/01/2018. With exception of the July, 2018 designated UST operator (DUSTO) inspection report, no monthly DUSTO inspection reports are available on-site for review. Additionally, no alarm history log is maintained, so the DUSTO reports do not have an alarm history log attached. At the minimum, the alarms from each Annual Monitoring System Certification shall be recorded.
Violation Division: Santa Clara City Fire Department

Violation Date: 08-21-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 09/01/2021. Facility has closed - Overfill valve have not been tested since effective date of October 13, 2018. This is scheduled for testing 8/22/19. Please submit report

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Description:	Per caller: 50 gallons of Jet A fuel released onto concrete due to transportation of fuel between two trucks causing overflow. Clean up done by Signature Flight Support Field Farm using dry sweep and contained in area. Excess fuel released into an internal airport catch basin, the substance would not leave airport and stays in facility water system. Nearest waterway is Guadalupe River which is not impacted

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Local Case Number: 06S1W35P04f
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Benzene, Toluene, Xylene, Gasoline
EPA Region: 9
Coordinate Source: Google Map Move
Quantity Released Gallons: Not reported
Begin Date: 05/09/1985
Leak Reported Date: 04/01/1992
How Discovered: Tank Closure
How Discovered Description: Not reported
Discharge Source: Other
Discharge Cause: Unknown
Stop Method: Close and Remove Tank, Remove Contents
Stop Description: Not reported
No Further Action Date: 08/26/2016
CA Water Watershed Name: Santa Clara - Palo Alto (205.50)
Dwr Groundwater Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community: Not reported
CA EnviroScreen 3 Score: 76-80%
CA EnviroScreen 4 Score: 55-60%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Claim Number: 12403, 20384
Claim Status: Ineligible, Ineligible
Site History: Shallow Groundwater near former well MW-3 is impactd with TPH-g and benzene from a former UST relaease. The extent of soil and groundwater contamination is deleinated.

S121766208

Violation Description: 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.

Violation Notes: Returned to compliance on 05/19/2016. THE FACILITY CURRENTLY DOES NOT PROVIDE HAZARDOUS WASTE TRAINING. ***A TRAINING FLIER WILL BE PROVIDED VIA EMAIL.

Violation Division: Santa Clara County Environmental Health

Violation Program: HW

Violation Source: CERS,

Site ID: 359400

Site Name: Signature Flight Support

Violation Date: 02-10-2022

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to promptly correct visible discharges and promptly remove any accumulations of oil in diked areas.

Violation Notes: Returned to compliance on 03/17/2022. Observed a weeping fuel filter on top of the 1,000 gallon biodiesel fuel tank and fuel in the spill bucket. Immediately address any releases of fuel.

Violation Division: Santa Clara County Environmental Health

Violation Program: APSA

Violation Source: CERS,

Site ID: 359400

Site Name: Signature Flight Support

Violation Date: 02-10-2022

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to regularly test liquid level sensing devices to ensure proper operation.

Violation Notes: Returned to compliance on 03/17/2022. High level liquid alarms on tanks A1, A2, and the Avgas tank were all non-functional at the time of inspection. Facility was advised that these require annual testing that is documented and prompt repairs.

Violation Division: Santa Clara County Environmental Health

Violation Program: APSA

Violation Source: CERS,

Site ID: 359400

Site Name: Signature Flight Support

Violation Date: 02-10-2022

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.

Violation Notes: Returned to compliance on 03/17/2022. Facility inspections do not meet the scope and frequency required by the SPCC plan. 1. Fire pump tanks are not included on logged monthly or weekly inspections, or periodic annual inspections. Per the facility SPCC plan, these tanks are to be inspected monthly and annually in accordance with STI SP001. 2. Monthly and annual fuel equipment inspection forms do not match STI SP001 form included in the SPCC plan appendices and are not substantially similar.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide and maintain secondary containment for bulk storage tank installations (except for mobile refuelers and other non-transportation-related tank trucks) sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation.
Violation Notes: Returned to compliance on 03/17/2022. The following bulks storage containers do not have adequate secondary containment: 1. Fire pump tanks have piping penetrations below the liquid level. These tanks are located in a room with a floor drain very near the tanks. Tanks do not appear to have secondary containment. 2. The mobile refuelers are parked in the parking lot at night with fuel inside, thus requiring sized containment during this time. There is a storm drain near the trucks that is covered by a mat, but the mat is not sufficient to prevent fuel from entering this drain. 3. Observed 1x55 gallon drum of hydraulic fluid with no secondary containment.

Eval Notes: Inspection commenced on 2/1/2022 and concluded today with issuance of
the report. The facility has 109,350 gallons of petroleum product
storage and is a Non-Qualified Facility. Facility created an SPCC Full
plan that was last certified by Professional Engineer (PE) James W
Greene on 10/1/2015 and reviewed on 1/29/2021. SPCC Plan was provided
by request via email prior to the inspection and paper appendices were
provided during the inspection by Derek Carpenter. The Annual Tank
Statement/HMBP was last certified by the facility on 7/2/2021 via CERS
ID# 10645891. There are no TIUGAs at this facility. This facility uses
an electronic monitoring system for internal fuel levels on the tanks,
and Krueger gauges to monitor interstitial spaces where applicable.
Generators and fuel tanks are monitored via visual inspection only.
Tanks rely on a fast response system for overfill prevention. The
loading area containment drains to a sump that is normally kept closed

the sump is connected to an interceptor system. On 9/20/2023, Mr. Patrick Hansen, Environmental Program Manager for San Jose Mineta International Airport, reported that the spill estimate was estimated to closer to 20 gallons. I visited the site on 9/26/2023 after several calls attempting to reach the facility operations manager that could not go through. Onsite, I waited for Dan Carmichael, Duty Manager of Signature Flight Support. I arrived at 9:10 AM and was able to speak to Mr. Carmichael at 9:50 AM. Mr. Carmichael stated that he was not on duty when the spill occurred, and that Matt Reynolds, Operations Supervisor, had been onsite but [Truncated]

Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 08-07-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency

Eval Notes: On site, 323 Martin Ave., to follow up on the outstanding return to compliance from the inspection by this office on 11/ 3/2016. Met with Daniel, spoke with Paul Jurasov, GSE Maintenance Manager, by phone to address the outstanding paperwork and violation status. Paul is to follow-up via e-mail and address this issue.

Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-10-2022
Violations Found: Yes
Eval Type: Routine done by local agency

Eval Notes: Inspection commenced on 2/1/2022 and concluded today with issuance of the report. Facility is a hazardous waste generator (small quantity) that generates waste contaminated solids (filters and absorbent), waste fuel, used oil, and oil and water mixtures from fuel farm maintenance and plane fueling activities. Waste is picked up every 6 months. The oil water separator sludge is picked up as needed and is managed as hazardous waste. CAL000409882 ID is currently active. Employees are training in hazardous waste management and weekly container area inspections are logged. Fire extinguishers are annually serviced and spill kit is adequate. The following violations were corrected at the time of inspection: G020- MARKING OF HAZARDOUS WASTE [3030007]: Observed 1x55 gallon drum of waste gasoline and 1x55 gallon drum of waste avgas with no state of matter or hazardous characteristics on the label. Both labels were corrected by employees.

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: OBSERVATION: The business failed to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. CORRECTIVE ACTION: Establish and implement a business plan for the facility. Submit documentation of correction to the unified program agency.

Violation Division: Santa Clara City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 704617
Site Name: SAE ENGINEERING
Violation Date: 06-01-2023
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: OBSERVATION: The generator has not obtained an active Identification Number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without obtaining an Identification Number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an Identification Number.

Violation Division: Santa Clara City Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 704617
Site Name: SAE ENGINEERING
Violation Date: 06-01-2023
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Violation Date: 06-01-2023
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: OBSERVATION: Waste coolant drums in the shop were observed open. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.
Violation Division: Santa Clara City Fire Department
Violation Program: HW
Violation Source: CERS,

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse

combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as

>12.5) had occurred on 11/18/2020 (pH 13.3) and on 3/4/2021 (pH 12.9). There are no spill reports available on the CalOES HazMat Spill Release Reporting Database for this address. The SCFD was not notified of the releases. Visited facility to meet with Keith Wharton who explained that the two releases were due to a boilout which occurs monthly for the forming section of the paper machine (wet end). They use a caustic solution Nalstrip 7577 which is mixed with water to pump into the machine. (Truncated)..... During this time the paper machine is down and water is not flowing at the same capacity. The pH was noted in Wharton s log book.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Site History: From 1960 to 1981, the site was owned by Gillmore Supply Company who leased the property to Metal Coating Company/Galvanizers, Inc., who operated a galvanizing facility. Operations included the use of zinc-rich plating solutions and other acidic process solutions. Releases likely occurred through accidental spills of process solutions, leaks from process tanks and piping, onsite disposal of spent solutions, and onsite discharges of wastewater. Lombardo Diamond Core Drilling Company, Inc. (Lombardo) purchased the property in 1985. Lombardo currently uses the property for parking and storage of vehicles, heavy equipment and supplies used in its concrete cutting business. Starting in 1983, several investigations have been performed which have completely defined the extent of soil and

groundwater contamination. Contamination has not migrated off site. Elevated levels of metals, primarily zinc, were found in the shallow soils near the former galvanizing building. Zinc had the highest concentrations. Volatile organic compounds were not identified. Elevated lead concentrations were found only in the top five feet of soil, while zinc concentrations were found deeper. Zinc concentrations were highest where the soils were more acidic (low pH values). Most of the zinc impact was 10-25 feet bgs, and was confined to the vicinity near the former galvanizing building. Shallow groundwater was also contaminated with zinc. The maximum concentrations of zinc in 1990 were 34,000 milligrams per kilogram (mg/kg) in the soil and 10,000 milligrams per liter (mg/l) in groundwater. The most recent maximum zinc concentration in groundwater in August 2020 was 1,500 mg/l. For comparison, the maximum contaminant level of zinc considered safe for drinking water is 5 mg/l.

Completed Date: 08/17/1995
Comments: RWQCB is overseeing the site

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 04/08/1993
Comments: The Lombardo site is approximately 2 acres in size and used for parking and storage of vehicles, heavy equipment and supplies by the company in its concrete cutting business. Lombardo has owned this property since April 1985. Historical information indicates that from the 1960's to the 1970's, metal coating company, a galvanizing facility operated onsite. Available information likewise indicates that metal coating may have discharged waste pickling and washing solution on-site, resulting to soil and ground- water contamination prior to Lombardo's purchase of the property in 1985. Sampling results in 1991 showed zinc in soil as high as 34,000 ppm; and 364 ppm in groundwater. The San Francisco Regional Water Quality Control Board (SF RWQCB) is currently providing direct oversight in remedial activities at the site. Site cleanup requirements (order 92-052) was issued on May 20, 1992 to Lombardo and outlines specific tasks needed to be complied with.

Site History: An approximately 7.87-acre site in currently improved with a large building originally constructed in 1946 and expanded with several connecting structures of various sizes from 1950 to 1982. Prior to the 1940s the site was agriculturally used as a hay or grain field. By 1946 and apparently through 1984, the site was used as an industrial wire manufacturing facility by Keystone Steel & Wire Company. Keystone's history is known to have included galvanizing and

annealing areas, rod cleaning lines, wastewater generation, sumps and wastewater treatment systems, a plating shop, a boiler room a machine shop, and a railroad spur along the northern and eastern site boundaries. Since approximately 1984, the site has been used as a multi-tenant warehousing and light industrial shops located within 12 tenant suites. The site is planned for redevelopment into a large data center following demolition of the existing infrastructure. Contamination has been reported in soil, groundwater, and soil vapor beneath the site. Contamination in soil vapor and groundwater has been adequately assessed and no additional mitigation is required at this time. Elevated levels of heavy metals exist within select areas of the site which will be investigated further. A Site Management Plan will be implemented during development to address worker safety and soil management.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Registry ID: 110002798465

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Site History: Historically, the property has been used for trucking, parking and automotive-related business since the 1950's. The prior owner, Provenzano Brothers, went bankrupt recently. One underground storage tank for gasoline was installed in 1985 and removed in 1992. Soil samples collected after tank removal did not indicate any leakage. 2007 due diligence site investigation, however, found PCE (up to 440 ppb) and TCE (up to 180 ppb) in groundwater. Since no on-site source could be identified (only one sample showed elevated lead concentration at 1,200 mg/kg), the applicant suspects the source of VOCs is from off-site. But, since groundwater gradient has not been established for the Site, this issue would have to be addressed later. A total of 668 tons of VOC-affected soil was excavated to the Site-specific clean up goal of 10 mg/kg for any individual VOC near well MW-2 in January and February 2012. Based on the results of post remediation groundwater monitoring VOCs in shallow groundwater are stable. Post excavation soil vapor samples have not been collected. Should the land use change, additional remedial action may be warranted. Land Use Covenant restricting the land use to commercial and prohibiting the use of groundwater was recorded

Site History: Site Management Requirements: Residual contamination in soil, groundwater, and soil vapor remains at the site that could pose an unacceptable risk under certain site development activities such as, but not limited to, site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time. Site History: The site is an active Costco Wholesale facility. The former USTs were removed in October 2017 in association with the relocation of the fueling facility from the eastern corner of the property to the southern corner of the property. Elevated soil concentrations remain immediately below the former UST(s), but the lateral extent is defined. Soil vapor was not assessed, because the former fueling facility is now a parking lot and no building overlies

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Integrated Compliance Information System (ICIS) provides a

Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

FORSYTH BOLIN PROPERTY MANAGEMENT, LLC (Continued)

1000129686

database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Quarterly Update:

FACILITY CLOSURE COMPLETED MARCH 2021 DTSC received the final certified closure report and accepted the closure certification. Hazardous waste is no longer being treated or stored at this location and the final facility closure is complete. The facility previously operated under a Standardized Hazardous Waste Facility permit that expired on January 8, 2019. The facility ceased operations on June 29, 2018 during bankruptcy proceedings. FACILITY DESCRIPTION/HISTORY ECS Refining was located at 705 Reed Street in Santa Clara. ECS was a metal recycler that operated a hazardous waste storage and treatment facility to reclaim precious and base metals from photochemical wastes, metal-bearing wastewaters, tin/lead solder dross and related wastes from electronic manufacturing, and other metal-bearing solid hazardous waste. The site was entirely paved and fenced. The facility was located in a developed industrialized area near the San Jose International Airport. The area is zoned for heavy industry by the City of Santa Clara. The facility transported hazardous wastes to the facility for recycling. Two company trucks picked up hazardous and non-hazardous wastes throughout Northern California daily. In addition, third party trucks made pickups and deliveries of hazardous and non-hazardous wastes several times daily. ECS had been operating at this location since 1979. The City of Santa Clara Historical District, a mixed use residential and commercial area, is located approximately 0.5 mile southwest, the University of Santa Clara is located within 1 mile southeast, and there are a few residences located 0.25 mile from this former facility. PERMITTING REGULATORY DESCRIPTION/HISTORY ECS received Standardized Permit Interim Status in 1993 and was issued a Standardized Hazardous Waste Facility Permit with an effective date of December 30, 1997. The permit expired on December 30, 2007. ECS submitted a timely renewal application in December 2006 . A renewal Standardized Permit was issued on January 9, 2009 with an expiration of January 8, 2019. The Series A Standardized Permit authorized ECS to operate a hazardous waste storage and treatment facility to reclaim precious and base metals

from photochemical wastes, metal-bearing wastewaters, tin/lead solder dross and related wastes from electronic manufacturing, and other metal-bearing solid hazardous wastes. Since the permit was issued in 1997, the Facility submitted four Class 1 modifications for minor operational changes and permit application updates, and had closed most of the 27 permitted units, including administrative closure of six units never operated or constructed.
